PROLUXE SELL TO THE WORLD

Since 2000, Proluxe has been a global trendsetter in the design and innovation of new building materials. We have always believed that our products should encourage people to live their lives to the fullest, whether in a home or a commercial space.

WE ARE COMMITTED
TO PROVIDING YOU WITH INNOVATIVE
FOOTLINE SOLUTIONS.

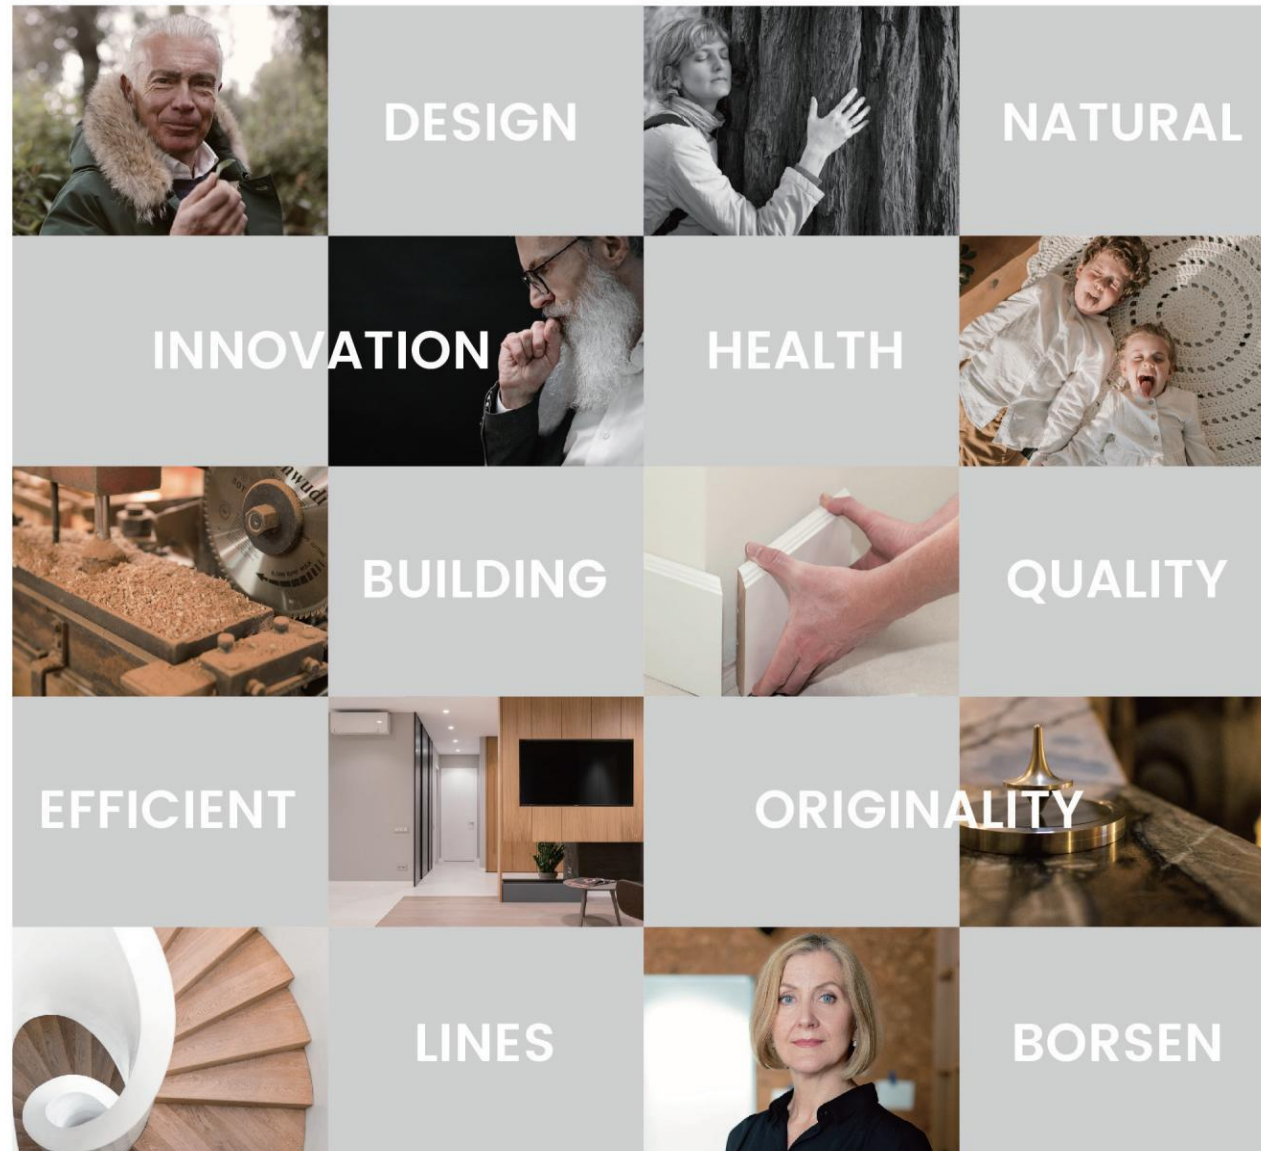

SEVERAL FACTORIES AND AGENCIES WORLDWIDE

Best-selling in 30 countries and regions
Operation and R&D team from 7 countries around the world
Has more than 100 products
More than 1,000 enterprises have been served

PROLUXE GLOBAL LEADERSHIP

In an artist's way, push the upgrade as far as possible

Industry leading R&D KEEP INNOVATING ON PRODUCTS

Proluxe has always pursued innovation and excellence from a global perspective, and has always influenced the iteration and upgrading of the skirting line industry with its unique modern aesthetic vision.

Proluxe has research and development team members from 7 countries around the world, and brings together cutting-edge design ideas from the United States, Germany, Italy and so on. Proluxe is committed to creating highly competitive skirting materials and unremitting efforts.

Proluxe has a number of advanced patent technology, in PVC / wood plastic / stone plastic / aluminum skirting line, stair board, door and window wardrobe and a series of decorative line has a number of high-tech products.

On this basis, Proluxe adopts synchronous global first-line production equipment and international product standards, as well as quality pre-sale and after-sales service!

SPC MOLDING

PROLUXE

PROLUXE SPC molding is a kind of environment-friendly high elastic material as the surface layer, waterproof environment-friendly material as the base material after many years of research and development. The new technology material SPP rock powder (namely stone powder and perlite integration), super wear-resistant surface, and the blue resilient technology layer composed of fighting fiber and glass fiber as raw materials, combined with the industry-leading uv epoxy resin process to create a wear-resistant surface, from raw materials to the process of 0 formaldehyde.

Advantages & Characteristics

Green environmental protection

High environmental performance, no pollution, no release of harmful substances, from raw materials to the whole process to maintain 0 aldehyde manufacturing.

Waterproof and wear-resistant

The surface is treated by epoxy resin special process, with perfect waterproof performance, wear-resisting level up to 10000 RPM.

Mute noise reduction

PROLUXE spc kickers can absorb 20 decibels of noise, suitable for all kinds of places.

Fire retardant, flame retardant

Fire protection level reached BI level, flame retardant grade material safer.

ENVIRONMENTAL PROTECTION

SUPER WEAR RESISTANT

WATER AND MOISTURE PROOF

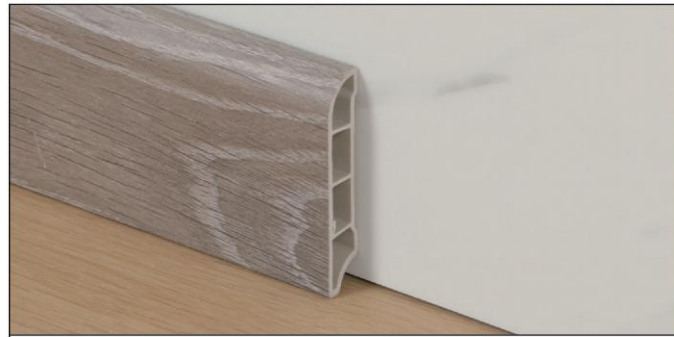

FIRE QUALITY IS SAFER

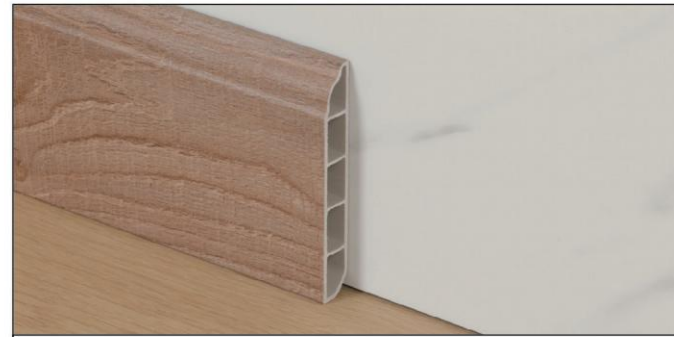

DIAMOND RELIABLE QUALITY

WPC MOLDING

PROLUXE

wpc molding is a composite material made of plastic and wood fibers with a small amount of chemical additives and fillers, and processed by special mixing equipment. WPC has high environmental protection, no pollution, pollution-free, recyclable greatly reduce the consumption of wood, and WPC waterproof moisture can be used in the traditional wood products can not be used in the environment.

Advantages & Characteristics

- **Environmental protection and nature**
High environmental performance, no pollution, no release of harmful substances, from raw materials to the whole process to maintain 0 aldehyde manufacturing.
- **Wear and antimicrobial resistance**
Super wear-resistant, no mothiness, no mildew, better quality, more durable.
- **Water and moisture proof**
Good waterproof performance, moisture will not be deformed and expanded, the quality will be pulled to the best.
- **Fire retardant, flame retardant**
Fire protection level is B1 level, out of the fire naturally, flame retardant grade material, safer.

FLOOR AND MORE

PVC MOLDING

PROLUXE

PVC molding is made of PVC and its copolymer resin as the main raw material, adding filler, plasticizer, stabilizer, colorant and other auxiliary materials on the flake continuous substrate, through coating process or calendaring, extrusion or extrusion process, the product is green, environmental protection, non-toxic, fireproof and waterproof, super quiet.

Advantages & Characteristics

- Environmental protection quality**
 The main component of PVC production is natural stone powder, which does not contain any radioactive elements.
- Strong wear resistance**
 There is a special layer of transparent wear-resisting layer on the surface of PVC skirting line by high-tech processing, and the super wear-resisting layer fully ensures the excellent wear-resisting performance of the ground material.
- Water and moisture proof**
 Good waterproof performance, moisture will not be deformed and expanded, the quality will be pulled to the best.
- Fire retardant, flame retardant**
 Fire protection level reached B1 level, out of the fire naturally, flame retardant grade material, safer.

MDF MOLDING

PROLUXE

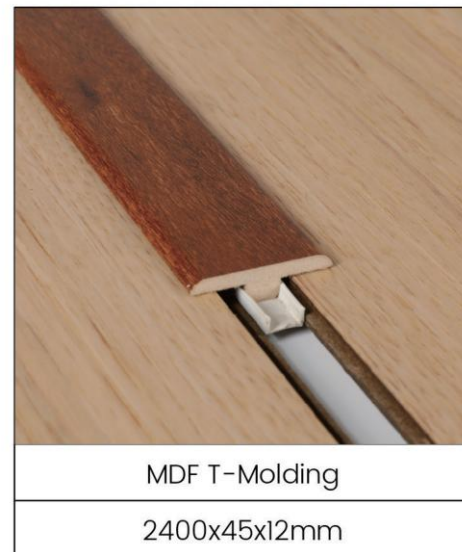

MDF molding color, rich pattern, fully meet people's visual personality and design needs. The surface wear resistant layer of the kicking line has good wear resistance, pressure resistance, impact resistance, fire retardant, chemical pollution resistance and other properties. proluxe foote line strict material selection, high environmental protection level, use assured, super clear wood texture and atmospheric tone make people feel comfortable.

Advantages & Characteristics

- **Green environmental protection**
Environmental protection is always put in the first place, strict control of formaldehyde emission.
- **Not afraid of dampness**
Water expansion rate is small not easy to deformation.
- **Easy installation**
The installation is convenient and easy, and the splicing place has no gap.

WATER PROOF MOLDING

DECORATIVE
LINES
DESIGN
Reliable quality

Waterproof and antifouling design armed to the joint, buckle, fully ensure the tightness, but also provide real watertight ability.
